For regular anime viewers, an app for tracking anime to efficiently manage and organize anime series is essential. To have a comprehensive app, some necessary features include:

## Progress tracking:

- ✓ Marking episodes, you've watched and tracking the next ones.
- ✓ Viewing your anime viewing history.
- ✓ Receiving notifications for new episode releases.

## List management:

- ✓ Creating lists for favorite, currently watching, plan to watch, and watched anime.
- ✓ Sorting and filtering lists based on various criteria.
- ✓ Sharing your lists with friends.

## Anime discovery:

- ✓ Searching for anime by name, genre, airing season, etc.
- ✓ Browsing through popular, highly rated, and upcoming anime lists.
- ✓ Reading detailed information about anime, including summaries, character lists, ratings, etc.

## Community:

- ✓ Participating in anime discussions with other users.
- ✓ Joining community groups based on shared interests.
- ✓ Sharing your thoughts and reviews about anime.

Therefore, our team will strive to implement this exciting project. We hope everyone will use it effectively and provide positive feedback.

# Synopsis

Tracking Anime is a system would maintain a comprehensive database of anime series, including their titles, genres, release dates, and synopses.

Users would create profiles within the system, allowing them to customize their preferences and track their interactions with different anime series.

Users could browse through the database to find anime series they're interested in. For each series, they could view a synopsis to get an overview of the plot, characters, and themes.

Users could mark whether they've read the synopsis of a particular anime series or not. This feature would help them keep track of which series they've explored and which ones they still need to review.

The system could use algorithms to analyze users' viewing preferences and provide personalized recommendations for anime series with synopses that match their interests.

Users could engage with other members of the community to discuss synopses, share recommendations, and exchange insights about different anime series.

The system could send notifications to users about newly added synopses, upcoming anime releases, or relevant community discussions.

<b>Design Plan:</b> Tracking Anime	<b>Document Name:</b> Problem Definition	<b>SWD/Form</b> No.01/PD/Ver1.0
<b>Effective Date:</b> 13/04/2024	<b>Version</b> 1.0	<b>Page No:</b> 1 of 43

## Problem Definition

Addressing the Needs of Anime Enthusiasts with a Comprehensive Tracking App

Anime enthusiasts, or "wibu" as they are often called, have a constant need for an efficient and organized way to track and manage their vast anime collections. To solve this demand, we propose the development of a comprehensive anime tracking application that caters to the specific needs of anime aficionados.

### Key Features:

- ✓ **Seasonality Awareness:** Stay updated on new anime releases and identify intriguing shows for the upcoming season.
- ✓ **Progress Tracking:** Keep track of your progress in each anime series, ensuring you never miss any episodes. Maintain a comprehensive history of your anime viewing journey. Receive timely notifications for new episode releases.
- ✓ **Personalized Management:** Create and manage personalized anime lists based on your preferences: favorites, status (currently watching, plan to watch or completed), etc. Implement effective sorting and filtering mechanisms to organize your lists effortlessly. Share your curated lists with fellow anime enthusiasts.
- ✓ **Anime Discovery:** Seamlessly search for anime by title, genre, release season, and other relevant criteria. Explore curated lists of popular, highly

rated, and upcoming anime titles. Delve into detailed anime information, including summaries, character profiles, reviews, and more.

Our Commitment: Our team is dedicated to bringing this exciting project to life, meticulously crafting an anime tracking app that caters to the specific needs of anime enthusiasts. We envision a tool that enhances the anime viewing experience, fostering a sense of community and empowering users to manage their anime collections with utmost efficiency.

We sincerely invite you to join us in this journey and welcome your constructive feedback to ensure we deliver an exceptional anime tracking app that exceeds expectations.

# Customer Requirements Specifications

## I. CRS/Requirements Specifications

Client/Project Undertaken:

1. List of inputs to the system
  - User data registration
  - Tracking anime list
2. List of outputs expected from the system
  - Tracking record
  - Anime record
  - Notification
3. Overview of processes involved in the system
  - Login
  - Display Anime Data
  - Picking and Saving Tracking Anime List
  - Checking Timeline of Anime

Admin/Project Undertaken:

1. List of inputs to the system
  - Account role data
  - Anime List Information
2. List of outputs expected from the system
  - Process account data and Role account
  - Anime record
  - Accounts record
3. Overview of processes involved in the system
  - Account role information
  - Modify accounts
  - Manage anime list

## II. CRS/Customer Acceptance Criteria

S.No	Customer's Acceptance Criteria
1	Given that app was opened, when user register account then admin checks and confirms whether to create an account.
2	Given that app was opened, when customer (admin, user) enters valid credentials then the system grants access.
3	Given admin login successfully, when admin modifies anime details then the system stores it.
4	Given user login successfully, when user adds new tracking anime then the system stores it.
5	Given user login successfully, when selects tracking anime then the system confirms and removes it.
6	Given user login successfully, when user edits anime details then the system saves the changes.
7	Given user login successfully, when user requests the list, and the system displays all anime. then the system displays all anime.
8	Given user login successfully, when user searches or filters then the system displays matching anime.
9	Given that it's been a day, when there are new episodes or releases for tracked anime then notify the users.

### III. Project Plan

#### 1. Project Details

- + Name of the Client: Tracking Anime
- + Date of Project Plan: April 2024
- + Project Vision/Objectives:  
Tracking Anime empowers users to conveniently track, manage, discover, and share their anime collections. Our application runs on a Desktop Application platform, providing distinct user and admin roles with specific privileges.
- + Scope:
  - Core Functionality: Anime Data Management, Tracking and Management, List Creation and Management, Community Features
  - Platform: Only Desktop
  - Data Persistence: Only Local (SQL Server)
  - Testing: Ensure functionality and user experience
- + Our understanding of the client organization:  
MyAnimeList is one of the anime tracking websites that I know of that is relevant today. This is a website that manages hot, seasonal anime series from many years ago and up to now
- + Project Organization with Responsibilities and Authorities:  
The roles:
  - Project Team Leader (PTL)
  - Designer
  - Developer
  - Tester
 The task: to get references in TaskSheet

#### 2. Project Initiation/Requirement Documents
